

Abstract Amendments

Please amend the abstract to read as follows:

A sealing gasket ~~with magnetic closure~~ is provided, comprising includes a support section bar (2) preferably made of plastic resin and a ~~magnetised~~ magnetized strip shaped element (5) inserted in the support ~~in~~ section bar. ~~and presenting~~ The magnetized strip has on a main face (5a). On the main face are at least a pair of ~~magnetised~~ magnetized longitudinal bands (6, 7) each subdivided into at least a pair of segments of equal or similar length and ~~presenting~~ each having an opposite polarity with respect to that of laterally flanking and longitudinally adjacent segments ~~[Also provided is]~~; a ~~The method for the [realisation] of~~ which produces the sealing gasket ~~with magnetic closure according to the invention wherein~~ ~~the magnetisation~~ magnetizes of the strip-shaped element ~~is performed after its insertion into~~ the supporting section bar.
